ENG/COM 395
Digital Rhetoric for Artificial Interactions/Intelligence (AI)

Your Instructor: Nupoor Jalindre
Semester: FALL 2019
Email: nsjalind@ncsu.edu
Location: Tompkins 109
Credit Hours: 3
Prerequisites: ENG 101

Time: T/Th 1:30pm - 2:45pm
Office Hours: By appointment
Course description

Most of us are familiar with chatbots, but rarely do we dig into their various layers of abstraction. These kinds of tools enable us to expand our definition of “communication” in the digital media age and help us create texts that better take advantage of the affordances of digital media for different rhetorical purposes. This course investigates human interaction with artificial intelligence (AI) systems, especially chatbots. Through close readings and provocative discussion of texts, students explore theories of rhetoric and AI in relation to topics such as identity, gender, posthumanism and culture. Along with rhetorical analysis, students will also learn to build chatbots using latest tools and technologies. The design components enable students to visualize socio-technical networks in the making of chatbots, develop algorithmic structures and test their design for diverse audiences. This class thus focuses on both rhetorical theory and praxis to help in redefining what information design means for artificial intelligence platforms.

Learning outcomes

- Critically identify and analyze rhetorical situations
- Visualize various technical genres and their connections with the audience, interface, technology, design and developers
- Demonstrate understanding of human experience through interactions with conversational interfaces
- Create an AI application by constructively applying a rhetorical perspective to
- Evaluate digital texts like AI applications

Course requirements

- Score above 59 in total from all assignments for passing this course
- Participate in all class sessions. Finish reading all materials for classes and come to the class with relevant questions, comments and ideas that can enhance class discussions.

Course materials

- The class schedule, assignment descriptions, announcements and grades for the class will be shared on Moodle.
- All the reading materials will be made available as PDFs or website links on Moodle.
- Bring your own device (BYOD) to go through and understand the materials.
- BYOD also required for workshop sessions in class. You can borrow technology from the libraries in case you have trouble getting your own.
- **Technology used** (apart from software available through NC State’s Google ID)
  - Twine, Github, Python, Anaconda IDE.
Evaluation of learning outcomes

- **Presentations (group) (10%+10%)**
  You will define and explain any one the assigned rhetorical concept from the list: appeals, canons, proofs (ethos, logos, pathos), figures (antithesis, repetition, progression), tropes (metonymy, synecdoche, metaphor) using visual aids. Illustrate the concept that you chose in an analysis of a scientific or technical issue or controversy. Pose two or three questions to get our conversation started about the topic.

- **Visualizing an information network (individual) (15%)**
  A network is a collection of data where the entities within that data are related through the principles of connection and/or containment. Digital texts that provide information, like websites, social media posts, scientific and technical papers, brochures, billboards, are all complex networks whose primary components are designers, audience and tools used to create them. In this assignment, you will use a data visualization tool to map the network and name its different components.

- **Project work (group) (50%)**
  Create a chatbot employing rhetorical and information design principles studied in class.
  - **Phase 1:** Defining goals and personality of chatbot (10%)
    Identify audience, Facebook page to host the chatbot and information delivery goals to be achieved using the chatbot. Create personality for chatbot which will define the style and language choices that you make.
  - **Phase 2:** Developing stories (15%)
    Based on the goals, create conversation stories. Identify information topics, keywords for queries. Develop static content like welcome and error messages.
  - **Phase 3:** Making connections (15%)
    Map the conversations using networked connections that set the flow of information. Conditional structures will be determined in this phase.
  - **Phase 4:** Deploying and testing (10%)
    Deploy the project on the page. Test the chatbot’s ability to respond to different kinds of audience (accessibility) and quality of conversations (usability). Feed failed conversations back into the chatbot’s design.

- **Presentation on final paper and reflection (individual) (10%)**
  In the presentation, you will demonstrate your chatbot and discuss the design elements. Write a reflection report to justify all the decisions you made while building the project. This report will serve as documentation for future reference.

- **Participation (individual) (5%)**
  Participation in class and excursions.
Grade distribution and expectations

Start grading

This is acceptable work. Someone else can use this work to develop a project.

No

Yes

This is average work. It accomplishes the goals completely with few errors.

< average

No

Yes

> average

“C+/C/C-”
Uses generic or predictable strategies and/or information. Can do better.

A+ 100-97
A  96-93
A- 92-90
B+ 89-87
B  86-83
B- 82-80
C+ 79-77
C  76-73
C- 72-70
D+ 69-67
D  66-63
D- 62-60
F  59-below

“F”
Project was never submitted, does not relate to the assignment or task at all, fails to address the audience(s) and/or purpose(s) of the assignment or task.

“D+, D, D-”
Project is incomplete, has missing information, many errors, partially matches the audience requirement and purpose.

“A+/ A/ A-”
Uses unique strategies and details that are clever, original, creative, and well articulated. Free of errors.

“B+/B/B-”
Project displays in-depth understanding of rhetorical concepts. The report includes thorough details that make the information clear and convincing.

This is exemplary work. It will have a solid impact and will be remembered as a model for future tasks.

This is very good. The requirements are met fully and the approach is impressive.

No

Yes
### Course Policies

#### Accessibility

I will do my best to accommodate any reasonable request from students with verifiable disabilities. In order to take advantage of available accommodations offered by the University and the department, students must register with Disability Services for Students at 1900 Student Health Center, Campus Box 7509, 515-7653. While I am happy to help with your needs, it is your responsibility to notify the Disability Services and me of any problems. Please notify us as early as possible in the semester for the most efficient and adequate help. If you have trouble at any point in class, don’t hesitate to reach out immediately.

#### Diversity

I would like to create a learning environment for my students that supports a diversity of thoughts, perspectives and experiences, and honors your identities (including race, gender, class, sexuality, religion, ability, etc.) To help accomplish this:

- If you have a name and/or set of pronouns that differ from those that appear in your official records, please let me know via email.
- If you feel like your performance in the class is being impacted by your experiences outside of class, please don’t hesitate to come and talk with me. I want to be a resource for you. Remember that you can also submit anonymous feedback (which will lead to me making a general announcement to the class, if necessary to address your concerns). If you prefer to speak with someone outside of the course, you can contact the [Office for Institutional Equity and Diversity](#).
- I am still in the process of learning about diverse perspectives and identities. If something was said in class (by anyone) that made you feel uncomfortable, please do not hesitate to reach out to me.
# Course Policies

## Academic Integrity

The Departments of English and Communication are committed to upholding the University's honor code. To read the University policy on academic integrity please see the [Code of Student Conduct](#). The University and the Depts. of English and Communication assume all students are familiar with these standards and procedures. If you have any questions about academic dishonor or doubts about what constitutes a violation please contact me.

## Communication Guidelines

Email is the best way to contact me. You can email me at nsjalind@ncsu.edu. I do not respond to students at any other address. I will try to answer student email within 24 hours on weekdays and within 48 hours on weekends and holidays. You can connect through twitter @nupoorwriting. I may not respond to other social media requests until the end of semester. I will be available to meet during my office hours and by appointment outside of those.

## Absences

I expect that you come to every meeting and act as an active participant in the class discussions. 2 absences are allowed after which 1 point from your final grade will be deducted for every absence.

## Late Policy

Late assignments will ONLY be accepted in the case of verified/documented emergencies in accordance with the excused absence policy or this course. See the [University Attendance Policy](#). If, in the case of an emergency you cannot present during your scheduled time, or cannot finish your final paper, you should let me know as soon as possible. If you have reasons for an excused absence, you can still turn in the paper or re-schedule your presentation after the due date upon presentation of appropriate documentation according to the University policies.
