

VISUAL AI Reflections of Multimodal final projects

(You will prompt AI to generate a visual of your textual reflections based on either keywords and phrases from your research or a written text prompt.)

Your reflection can include the following:

A. Rhetorical Analysis. Explain the rhetorical choices you made in creating your project

B. Growth as a Researcher and Writer: Reflect on your development over the semester

Tip: Don't just summarize what you did—explain why you made the choices you did, what was challenging or rewarding, and how you'll use these skills in future writing situations. Organize your answer into paragraphs with topic sentences.
